EXPERIENCE

Purdue University - ITAS

2014–Present

Senior Application Developer

Lead the design, development, testing, implementation and maintenance of software solutions. I develop wireframes, comps and prototypes for mobile and web. Work closely with developers and build user interfaces in HTML, CSS, and JavaScript. I analyze existing development processes and tools and explore and integrate new tools and processes.

Alleyg Creative Studio

2010–Present

Co-founder

I work with my wife to help manage and support two Etsy storefronts, Paper Street Press and Paper Mango. We have sold over half a million dollars of custom designed paper products and stamps in the last three years. I manage bookkeeping and technical resources, help produce and ship orders in the evenings, and maintain our website and client upload forms.

Purdue University - ITAS

2010–2014

Application Developer

I designed, developed, and maintained the internal and externally facing websites and web applications for Housing and Food Services at Purdue University. I developed standards compliant, attractive, and accessible interfaces for multiple web applications and websites using modern and emerging best practices in HTML, CSS, and Javascript.

J.D. Byrider Systems, Inc.

2009–2010

Junior Programmer / Analyst

Converted classic ASP reports and interfaces to database driven C#. Located and fixed bugs reported by end users.
